2. Wage and Salary Earners in Civilian Employment in N.S.W.: Principal Industrial Groups

(Excluding employees in rural industry, employees in private domestic service, and Defence Forces)

Notes:—

1. The current series of employment statistics is based on benchmark data derived from the 1954 and 1961 censuses of population. For periods between and since the censuses, the estimates are derived from:—
 - (a) monthly returns supplied by employers for purposes of Commonwealth pay-roll taxation;
 - (b) monthly returns from governmental authorities;
 - (c) some other direct records of monthly employment (e.g. hospitals); and
 - (d) estimates of changes in the number of employees outside the scope of the previous sources.

The figures for current months are subject to revision in the light of annual factory censuses, periodical surveys of retail establishments, and other collections.

2. Employees in rural industry and in private domestic service, and members of the full-time defence forces at home or abroad, are excluded from the scope of the series.
3. The series is designed to measure the *current monthly trends* in the defined fields. The estimates are compiled on an establishment or enterprise basis, and the benchmark data (which have been derived from industry tabulations compiled on the occasion of the population censuses from schedules provided by individuals) have been adjusted as nearly as possible to this basis.

8. Population, Migration, Births, Deaths, and Marriages, New South Wales

Note. The estimates of the population for periods between the 1954 and 1961 censuses of population have been revised in the light of the final results of the 1961 census. The revised estimates represent the population ascertained at the 1954 census plus the subsequent natural increase and net migration (recorded net migration plus an adjustment for the discrepancy disclosed by the 1961 census). The estimates for periods since the 1961 census are subject to similar revision when the population is ascertained at the next census.

BUILDING ACTIVITY IN NEW SOUTH WALES

Notes. 1. Building is classified as *private* or *government* according to ownership.

2. Figures of *building approved* have been compiled from (a) permits issued by local government authorities to build in that part of the State (covering all municipalities and the larger residential areas within shires) subject to building control by local authorities, and (b) contracts let or work commenced and day labour projects authorised by governmental authorities. Some building in rural areas is excluded.

3. The value of *building jobs approved* represents the estimated value of the whole job when completed, excluding the value of the land on which the job is carried out.

40. Instalment Credit for Retail Sales, N.S.W.*

Note. This statistical series covers credit schemes which involve repayment by regular predetermined instalments and which relate primarily to the financing of retail sales of goods. It embraces hire purchase, time-payment, budget account, and personal loan schemes, but does not cover lay-bys, credit accounts not payable by regular predetermined instalments, the financing of sales of land and buildings, property improvements, and services (e.g. repair work and travel), and rental and leasing schemes.

* Weighted average rate on first mortgages registered, where mortgagee is a corporation (other than a bank or a building society), or an individual. Mortgages taken by Government Agencies are excluded. Average for year or for 3 months ended month shown.

† Compiled by Reserve Bank. From 1956-57 to 1958-59, average of yields on last Wednesday of each month for a theoretical 2-year security (derived by linear interpolation between the yields on two short-term securities) and for a 12-year security (derived as a weighted average of yields on securities maturing in 10 or more years). From July, 1959, average of daily yields, for week centred on last Wednesday in each month, for theoretical 2-year and 15-year securities (derived from a freehand curve).

‡ Rate current at end of period.

¶ The limit was raised to £1,500 in June, 1954, to £2,000 in November, 1958, to £2,500 in January, 1961, and to £3,000 in July, 1961.

49. Index of Prices of Shares on Sydney Stock Exchange

This index relates to ordinary shares of the principal companies (excluding banking companies) listed on the Sydney Stock Exchange whose business in New South Wales is extensive. The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 34 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made for changes in capital structure.

55. Export Price Index, Australia

Notes:—

1. The current Export Price Index is compiled as a weighted average of the relative price movements of 29 commodities, the weights being based on the exports (valued at 1959-60 prices) of the commodities in the five years 1956-57 to 1960-61. In these years, the selected commodities accounted for about 83 per cent. of the total value of Australian exports.
2. A comparable series of index numbers has been compiled by linking, at the year 1959-60, the "All Groups" Index in the current and previous Export Price Indexes. The index numbers (Base: 1959-60 = 100) for the years 1954-55 to 1958-59 are 114, 105, 117, 102, and 90 respectively.

56. Wholesale Price (Basic Materials and Foodstuffs) Index

Commodities are priced in their primary or basic form wherever possible. Prices are drawn mainly from Melbourne sources. Apart from locally produced building materials, and one or two minor commodities, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets.

58. Consumer Price Index

Notes:—

- For current statistical purposes, the Consumer Price Index replaces both the "C" Series Retail Price Index (first compiled in 1921) and the Interim Retail Price Index (constructed as a transitional index in 1954).
- The Consumer Price Index measures variations in prices of commodities and services as affecting a high proportion of the expenditure of wage earner households. Changes in the pattern of this expenditure since 1950 have been reflected in the index by the introduction of additional items and altered weighting patterns. The new index is more comprehensive than the earlier indexes.

* For State Awards, the amounts shown to February, 1959 represent the basic wage together with so much of any margin and any further amount necessary to make the minimum wage payable equivalent to 75 per cent. of the basic wage for males. Following the increase in the basic wage to the 75 per cent. equivalent, the amount shown from February, 1959 is the basic wage exclusive of any margin. This change was applied in State Awards from different dates, beginning in March, 1959.

† Quarterly adjustments for movements in retail prices were discontinued in September, 1953, in both Commonwealth and State Awards. They were restored in State Awards in November, 1955.

60. Weighted Average Minimum Weekly Wage Rates, N.S.W.

Notes:—

1. The indexes of minimum wage rate embrace a representative range of occupations and are based on the occupation and industry structures in 1954. The wage rates used in the indexes are the rates payable for a full week's work (excluding overtime), as prescribed in the relevant industrial awards, determinations, and agreements. The rural industries are excluded from the indexes.
2. The money amounts shown should not be regarded as actual current averages, but as an index of changes expressed in money terms.
